

Minutes from team meeting held on 6/2/2012:

ARs:

- **Katya:** send out email reminder about Thursday meeting.
- Meeting began at 6:00 p.m.
- Meeting with sponsors tomorrow to talk about DWARF vs non-DWARF
- DWARF diagram:

```
main()
{
    {
        {
            int x = ...
        }
    }
}
```

- Jacob: there is currently a problem getting data into blob.
- Team will be getting together this week to hack out the driver-side code.
- Team meeting this Thursday at noon.
- AR: Katya send out email reminder about Thursday meeting.
- Devin has looked (glanced) at Jacob's check-ins.
- Code review of Jacob's code:
- Disable password in vm: /etc/passwd
- What is function return used for?
- More code to write for Jacob's driver-side portion:
- Code to add data name, size, ...
- Code to manipulate blob elements
- Schedule:
  - 4 weeks needed for driver development.
  - Binary blob format should be done by start of summer.
  - Hot path decisions should be done by start of summer.
  - Final presentation on August 27.
  - We want to be done in 6 weeks.
  - V+V will be done alongside development.
- Spring term presentations:
  - David - milestones and scheduling
  - Devin - blob
  - Jacob - requirements

- Kyle - run demo on laptop
  - John - V+V plan
  - Katya - risk management
- Meeting ended at 7:25 p.m.
