

Minutes from team meeting held on 7/30/2012:

ARs:

- **Everyone:** find out if we have met requirement 2.2.3.
- **Katya and Kyle:** meet this week to wrap up userspace testing.

- Requirements that need to be completed:
 - Userspace search feature.
 - Interrupt configuration and layout.
 - Register contents.
- AR: Everyone find out if we have met requirement 2.2.3.
- Next meeting with sponsors: discuss use of “iperf” performance measuring tools.
- Next meeting with sponsors: ask how we can get register contents.
- We have a meeting with our sponsors next week (Monday) at 7:05.
- QEMU error injection: Kyle cannot get it to work for our needs.
- Python testing: Katya and Kyle to meet this week (Thursday) to wrap this up.
- debugfs location change
 - Jacob: How do we know where debugfs is mounted?
 - Jacob: Where is /debug directory specified?
 - Devin: we should add a setter api function for Loki to set debugfs directory.
 - simple_pin_fs() - found in fs/debugfs/inode.c
