

Online meeting 5/23/2012

ARs:

Everyone: schedule 1:1 with Devin asap

Katya: looking at netdev.c; posting minutes from this online meeting

David: posting minutes from the previous meetings

Jacob: work a little more on WBS, status report for the sponsors, set up meeting with the sponsors about binary blob

Kyle: once WBS is turned in, subdivide it into work components

Next online meeting is Friday 4pm, next group meeting is with Bart on May 29th at 7pm.

For more information read the log:

16:07 < arik181> so, mic check

16:07 < arik181> who all is in here?

16:07 < sowles> I am present.

16:07 < arik181> huddlesd, sowles, arik181

16:07 < huddlesd> yes!

16:07 < arik181> I just saw bear in the hall

16:07 < arik181> maybe I should make sure she's on her way

16:08 < arik181> that would mean we're missing a jsackey and a kpelton

16:09 < huddlesd> john dropped his connection to the server a few lines up I think.

16:09 < arik181> oh

16:09 < arik181> well, that's not good. heh

16:10 < arik181> I guess we'll get started and we can collectively mock the people who didn't show

16:10 < arik181> bear is inbound.

16:10 < sowles> sweet

16:10 < @bear> hello everyone

16:10 < sowles> hey bear!

16:11 < arik181> so, first order of business: does anyone have any opens?

16:11 < arik181> i.e.: burning issues they need to talk about?

16:11 < sowles> nope, I'm good

16:12 < arik181> bear, huddlesd?

16:12 < @bear> not burning

16:12 < @bear> but

16:12 < @bear> betdev.c file

16:12 < arik181> doesn't have to be burning.

16:12 < arik181> netdev.c?

16:12 < @bear> what is it exactly you want me to do with it?

16:12 < sowles> smoldering is just fine

16:12 < @bear> yeah, netdev.c

16:13 < @bear> so just stare at it until I know what it does and report?

16:13 < arik181> so, bear, I want you to look at that code and figure out every piece of information that they're dumping into debugs

16:13 < arik181> we need to know what items they're interested in displaying

16:13 < arik181> we probably want to be dumping the same or similar information

16:13 < arik181> into debugfs

16:13 < @bear> sorry for the stupid question, but why do we have this file?

16:13 < arik181> make sense?

16:13 < arik181> heh

16:13 < @bear> yeah

16:14 < arik181> we have the file because it's in the driver source
16:14 <@bear> Is it part of the driver?
16:14 < arik181> it's included with the driver, yes.
16:14 <@bear> I thought you guys said Sannon implemented it or something
16:14 < arik181> it's the current version of what we're working on
16:14 < arik181> well, yes.
16:14 <@bear> so it's been used before
16:14 < arik181> he did, if I'm correct.
16:14 < huddlesd> current version?
16:14 < arik181> i.e.: it's a stop-gap.
16:15 < arik181> they want something better, but this is what they're using now.
16:15 <@bear> okay
16:15 <@bear> cool
16:15 <@bear> now I know what to do :)
16:15 < arik181> cool.
16:15 < arik181> anyone else?
16:15 < arik181> huddlesd?
16:16 < arik181> ok
16:16 < huddlesd> I'll repeat, minutes will be up in a few mins as pdf's in the 'files' section of readmine
16:16 < arik181> excellent.
16:16 < arik181> did you get my email yesterday?
16:16 < huddlesd> and
16:17 < huddlesd> no i did not
16:17 < huddlesd> but i will do that after this meeting
16:17 < huddlesd> i have the rest of the night for capstone!!
16:17 < arik181> cool.
16:17 < huddlesd> ar is?
16:17 < huddlesd> action required?
16:17 < arik181> yes.
16:17 < huddlesd> cool
16:17 < huddlesd> i was going to say...
16:18 < arik181> so those should come out of the meeting minutes at the end of the meeting, and go into redmine as tasks
16:18 < arik181> or whatever we're using by the end of the week
16:18 < huddlesd> that im going to remove the minutes from the documents section of redmine
16:18 < arik181> probably jira
16:18 < huddlesd> so there is just one place for them
16:18 < arik181> good.
16:18 < huddlesd> how is jira going?
16:19 < arik181> I've not had a chance to play with it yet, but probably that's tonight's project.
16:19 < arik181> I'm completely caught up on everything else right now
16:19 < arik181> so the rest of the week is capstone for me.
16:19 < arik181> I'm going to send out an email tonight talking about next steps
16:19 < arik181> I'm having Jacob take another look at the WBS,
16:20 < huddlesd> should we upload another copy to redmine?
16:20 < arik181> and once it's settled, we're going to start pulling tasks from that and putting them into project management
16:20 < arik181> of the WBS?
16:20 < huddlesd> the png looked outdated
16:20 < huddlesd> yes

16:20 < huddlesd> nevermind
16:20 < sowles> that actually reminds me...
16:20 < huddlesd> jacob, maybe you could do that when you get it settled??
16:21 < sowles> Since I may be blowing up the WBS, what's the best way to back up the current version?
16:21 < huddlesd> an xml file
16:21 < huddlesd> downloaded from the web tool
16:21 < arik181> so, we've been putting the xml and png files into the redmine files section
16:21 < kpelton> oh forgot sorry
16:21 < arik181> those can be exported.
16:21 < kpelton> here now
16:21 < sowles> can you load the xml file in wbstool.com?
16:21 < arik181> np
16:21 < arik181> yeah
16:21 < sowles> ok, sweet
16:22 < sowles> I'll put the .xml and .png files for the current version before I start hacking away at it.
16:22 < arik181> I was actually tempted to move us to using straight github, since it has an issue tracker, but there's no gantt chart or anything like that.
16:22 < arik181> cool
16:22 < arik181> sounds good.
16:23 < arik181> kpelton: any opens?
16:23 < kpelton> I am going to wait on making the public key until we decide our git strategy
16:23 < kpelton> that's it
16:23 < arik181> that's cool.
16:23 < arik181> I'm going to work on that tonight
16:24 < arik181> it will be github for sure
16:24 < arik181> probably jira
16:24 < kpelton> ok
16:24 < arik181> my next major AR for you will be once we turn in the WBS
16:24 < arik181> I'm going to want you to subdivide it into work components that make sense
16:24 < arik181> the code portion
16:24 < kpelton> ok
16:25 < arik181> I think that's about all I had
16:25 < arik181> for the *ahem* latecomer
16:25 < arik181> jacob is doing another once over on the WBS
16:25 < arik181> and then we'll turn it in
16:25 < arik181> status report is due tonight
16:26 < arik181> jacob, I'll have that for you tonight as well
16:26 < arik181> for the sponsors
16:26 < kpelton> can you forward that to everyone
16:26 < arik181> also, include in your email that we'll want to set up a meeting for the binary blob with them
16:26 < arik181> yeah, I can do that.
16:26 < kpelton> so we are all on the same page
16:26 < arik181> yeah
16:26 < arik181> oh
16:26 < arik181> one more thing
16:27 < arik181> two more things
16:27 < arik181> heh
16:27 < arik181> David: you're taking minutes, yes?

16:27 <@bear> do you guys need this meeting to be put on redmine?
16:27 <@bear> it's being logged
16:27 < arik181> that would be good, but I also want ARs pulled out.
16:27 <@bear> I can do that
16:27 < huddlesd> yep!
16:27 < arik181> so david you don't have to do minutes
16:27 < arik181> since we have the log
16:28 < huddlesd> ok
16:28 < arik181> just upload the log and pull out all ARs
16:28 <@bear> sure
16:28 < arik181> um
16:28 < arik181> there was one other thing
16:28 < arik181> oh yeah
16:28 < arik181> the 360s are going to be coming up at the end of term
16:28 < arik181> before that, I want to do another round of 1:1s
16:28 < arik181> like we did the second week
16:29 < arik181> so everyone needs to schedule a meeting with me.
16:29 < huddlesd> what week are you thinking?
16:29 < arik181> let's see
16:29 < arik181> looking to see when the term ends
16:29 < arik181> ...
16:30 < arik181> so
16:30 < arik181> next week and the week after
16:30 < arik181> I'd like to get as many in next week as possible
16:31 < arik181> so try to schedule them with me then
16:31 < arik181> OH
16:31 < arik181> crap
16:31 < arik181> there's one *more* thing
16:31 < arik181> I'm terrible, sorry
16:31 < arik181> should have been more organized for this
16:31 < arik181> Bart will be coming to one of our meetings
16:31 < arik181> I was going to set it up for next Monday
16:31 < arik181> *but*
16:32 < arik181> there's a catch
16:32 < arik181> next monday is a holiday
16:32 < arik181> so we have to reschedule our meeting for another day next week.
16:32 < arik181> which means we need to find a time that works for everyone
16:32 < arik181> *and* for bart
16:32 <@bear> remember we used to meet on Tuesdays?
16:32 <@bear> like 7pm
16:32 < kpelton> tuesday is good for me next week
16:32 < kpelton> maybe 5 or 6
16:32 < arik181> will that work for everyone?
16:32 < huddlesd> that would work for me
16:33 < kpelton> 7 is sorta late
16:33 < arik181> yeah
16:33 < arik181> let's say 6
16:33 <@bear> I don't get out of class until 6:30pm
16:33 < arik181> hm
16:33 < arik181> that's why 7
16:33 < arik181> ok

16:33 < arik181> we'll have to do it at 7 then
16:33 < arik181> does anyone have any issue with that?
16:33 < sowles> that's fine
16:33 < kpelton> alright that is fine then
16:33 < arik181> ok
16:33 < huddlesd> sounds good
16:33 < arik181> I'll let John know by email.
16:34 < arik181> that's all I've got
16:34 < huddlesd> I have something.
16:34 < arik181> fire
16:34 < huddlesd> the main capstone channel shows eric asking about requirements for the end of term presentation
16:34 < huddlesd> should we be looking at that also
16:35 < arik181> yes
16:35 < arik181> I'll forward the email
16:35 < arik181> but the basic gist is as follows:
16:35 < arik181> the documents we've been turning in, plus a demo
16:35 < arik181> of something that kind of works
16:35 < arik181> first iteration.
16:36 < arik181> make sense?
16:36 < huddlesd> i think so
16:36 < arik181> ok
16:36 < arik181> so
16:36 < kpelton> yeah sounds good
16:37 < arik181> ARs from the last few sets of minutes should be in tonight
16:37 < huddlesd> yep yep
16:37 < @bear> notes and ARs will be up tonight
16:37 < @bear> from tonight
16:37 < arik181> and one of those ARs is to schedule a meeting with me by the end of this week for a 1:1
16:37 < arik181> good to go?
16:37 < @bear> yes
16:37 < arik181> excellent
16:37 < sowles> good to go
16:37 < arik181> If there's nothing else, I will ttyl
16:38 < @bear> bye
16:38 < sowles> later
16:38 < huddlesd> bear: how far back is the irc log going?
16:38 < @bear> very beginning of the capstone
16:38 < huddlesd> excellent!
16:38 < huddlesd> how do we access that?
16:39 < @bear> I can post it, but for now only I have access to it
16:39 < huddlesd> because its just another irc user logged in?
16:40 < @bear> no
16:40 < @bear> it's in my local directory
16:40 < huddlesd> sounds good
16:40 < @bear> I'll think of the ways to share it with everyone
16:40 < @bear> good to go?
16:40 < huddlesd> could just put it in your public html directory
16:41 < huddlesd> ?
16:41 < huddlesd> good to go!

16:41 <@bear> yes, I'll do that for now

16:41 <@bear> well, later tonight
