Minutes from team meeting held on 6/7/2012:

ARs:

- **David**: come up with list of features we would want to add to userpace tool (by next term).
- **Katya**: come up with solution for how our command line interface should look and be organized (next term).
- **Everyone**: send email to Devin by Sunday night with plan for their presentation role.
- **Katya**: test pretty print script with Kyle's most recent blob.
- **Katya**: add hex output feature to her current python script.
- **John**: ensure data in blob matches the hexdump program's output.

- Kyle wrote a parsing script for pahole.
- Kyle will demo this script during the midterm presentation.
- debugfs blob output is now being cleaned up when the driver is unloaded.
- There will be a meeting at beginning of next term with sponsors to discuss how to break/induce errors with the virtualized e1000 device.
- The sponsor meeting last Tuesday changed the userspace requirements.
- Kyle's method requires that output blob uses same names that pahole would find after examining the kernel object.
- Month into term (summer) and we're done - we should look at adding nice-to-have features.
- AR: David come up with list of features we would want to add to userpace tool (by next term).
- AR: Katya come up with solution for how our command line interface should look and be organized (next term).
- Feature idea: ability to compare changes in states.
- AR: Jacob set up meeting with sponsors at the beginning of next term to demo iteration 1.5 to sponsors.
- Meeting Monday at 6:00 p.m. for presentation warm-up.
- AR: everyone sends email to Devin by Sunday night with plan for their presentations.
- AR: Katya to test her pretty print script with Kyle's most recent blob.
- AR: Katya to add hex output feature to her current python script.
- AR: John ensure data in blob matches the hexdump program's output.
